AI / ML Engineer | Azure AI Foundry | AWS Bedrock | GenAI | 2 Years 3 Months

PROFESSIONAL SUMMARY

AI/ML Engineer at TCS with 2 years 3 months of experience building multi-agent GenAI systems, RAG pipelines, and cloud automation. Built a production AI Code Assist Agent on Azure AI Foundry and won the TCS AI Challenge with an AWS Bedrock automation. Promoted to System Engineer within one year. Holds 5 certifications across AWS, GCP, and Anthropic Claude.

TECHNICAL SKILLS

- **Cloud & AI Platforms:** Azure AI Foundry | Azure OpenAI | Azure ML | Azure Cognitive Services | Azure AI Search | Azure DevOps | AWS Bedrock (Claude, Titan) | EC2, S3, Lambda, RDS, IAM, CloudWatch
- **GenAI & LLMs:** Multi-Agent Orchestration | RAG | Prompt Engineering | Few-Shot | Chain-of-Thought | LLM API Integration
- **DevOps & CI/CD:** Jenkins | AWS CodePipeline | Docker | Git
- **Programming & Query:** Python | SQL | REST APIs | JSON
- **Tools & Practices:** Linux (RHEL/Ubuntu) | Spring Boot | JIRA | Agile/Scrum

PROFESSIONAL EXPERIENCE

System Engineer – AI & Cloud

May 2025 – Present

Tata Consultancy Services (TCS)

Pune, India

- Designed and implemented a multi-agent GenAI solution using **Azure AI Foundry** to automate code understanding, generation, testing, and impact analysis for enterprise applications; reduced developer code review time by approximately 5–6 hours per week
- Architected a Supervisor Agent orchestration layer to perform intent detection, route prompts to specialized agents, and consolidate responses
- Built specialized agents including Code Explanation, Code Generation, Test Case Generation, and Impact Analysis to support developer productivity and code lifecycle automation
- Developed impact analysis capability to identify file dependencies, nested include relationships, and downstream impact using enterprise dependency data and documentation context
- Implemented RAG via **Azure AI Search** by integrating enterprise sources (TRS documents, repositories, attached files) to improve response accuracy
- Integrated solution with Azure DevOps and enterprise storage for contextual source code retrieval and real-time developer assistance
- Optimized agent instruction frameworks and prompt engineering to reduce hallucinations and ensure consistent outputs; followed Responsible AI principles for enterprise-grade deployment

Assistant System Engineer – Cloud & Backend

May 2024 – Apr 2025

Tata Consultancy Services (TCS)

Pune, India

- Built GenAI validation tool on **AWS Bedrock (Claude)** saving 8 hours/week; won **TCS AI Challenge**
- Set up Jenkins and CodePipeline CI/CD for Spring Boot apps; cut deployment time from 2 hours to 15 minutes
- Automated 10+ tasks via Python and Shell scripts, saving 6 hours of manual effort per week
- Managed Linux (RHEL/Ubuntu) servers; configured IAM roles and security groups per least-privilege principles

KEY PROJECTS

GenAI Validation Automation

TCS AI Challenge Winner

- Built end-to-end validation workflow using AWS Bedrock (Claude), Lambda, Python, and S3; replaced a fully manual process and saved 8 hours/week
- Applied few-shot and chain-of-thought prompting with structured JSON outputs for consistent model responses

EDUCATION

Bachelor of Engineering – Computer Technology

Aug 2019 – Jun 2023

Kavikulguru Institute of Technology and Science, Ramtek

CGPA: 7.37 / 10

CERTIFICATIONS & AWARDS

Certs: AWS Developer Assoc. | AWS AI Practitioner | GCP GenAI Leader | Claude Certified Developer – Foundations | Claude Certified Associate – Foundations | Azure AI Engineer Associate AI-102 (*renewal in progress*)

Awards: TCS AI Challenge Winner | TCS Engineer Excellence Expo Pune 2026 – Runner Up | TCS Innovation | TCS Performance Excellence | TCS Team Award | Excellent Learner
